Dear Mr. Chan,

Appreciate you reaching out and your pro-active approach to the problem. We really appreciate your actions regarding the rubbish which I am sure will be very effective countering the problem.

Some of our neighbours however do not appreciate the seriousness and continue to feed the animals around our hospital. I often see plastic bags with food lying on various places with packs of dogs or boar or cats around them, often after midnight.
I appreciate your education efforts of the neighbourhood which I hope will offer some insight in those who –probably unwillingly- continue to enhance the problem by feeding wild animals.

[redacted] we do witness incidents from time to time. Unfortunately, my son had to undergo rabies immunisations due to an unprovoked attack by a wild dog on Mount Kellett Road. We now walk our own pets with a stick in hand.

Thank you for your input and advocacy and keeping in mind the wellbeing of residents and in particularly, our patients.

With regards,

[redacted]
