

Question on the service of North Lantau Hospital
(Paper CACRC 2/2016)

And

Question on the medical service in North Lantau
(Paper CACRC 3/2016)

Consolidated reply of Food and Health Bureau and Hospital Authority

In the year of 2016-17, the North Lantau Hospital will provide additional 15 Day Rehabilitation quota and increase Medicine and Geriatrics quota. Depending on manpower and resources, the Hospital Authority (HA) will continue to expand various services of the hospital in phases. The HA will keep the District Council updated about the service development of the North Lantau Hospital and the Kowloon West Cluster.

Apart from the 10-year hospital development plan, the HA is also formulating longer-term strategies to expand and modernise hospital services with a view to meeting long-term healthcare needs of the community. In this connection, the HA intends to reserve the adjoining site of the North Lantau Hospital (including the piece of land in Lantau originally reserved for private hospital development) for future expansion of the Phase II of the hospital project.

The HA will continue to regularly monitor and review the demand and supply of hospital services and make timely planning for relevant projects to meet long-term healthcare demand.
