

**Food and Environmental Hygiene Department**  
**Anti-mosquito Campaign 2017 (Phase II) in Sai Kung District**

**Purpose**

To brief Members on the arrangements and details for the Anti-mosquito Campaign 2017 (Phase II) to be launched by the Food and Environmental Hygiene Department (FEHD) in Sai Kung District.

**Background**

2. The Anti-mosquito Campaign 2017 (Phase I) organized by FEHD was launched between 13.2.2017 and 17.3.2017. Actions taken in the district and the results are detailed at **Annex I**.

3. In 2016, there were four local and 120 imported dengue fever cases, two imported Zika virus infection cases, two imported Japanese encephalitis cases and eight imported chikungunya fever cases in Hong Kong.

4. Zika virus is transmitted to humans mainly through bite of infected *Aedes* mosquitoes. Though *Aedes aegypti*, which is considered as the most important vector for transmitting Zika virus to humans, is currently not found in Hong Kong. However, *Aedes albopictus*, which is widely present locally, is also considered as potential vectors. As long as there is extensive international travel, there always remains the risk of introducing Zika virus into Hong Kong. If an overseas Zika-infected person enters Hong Kong, and is subsequently bitten by an *Aedes albopictus* in Hong Kong, the infected *Aedes albopictus* may carry the virus and lead to a secondary spread in Hong Kong. The public should therefore stay vigilant about the potential risks of mosquito-borne diseases, while the community and various Government departments should make concerted efforts and actively participate in mosquito

prevention and control. Besides, Zika virus can also be transmitted through blood and sex contact.

5. In order to safeguard public health and to sustain mosquito prevention and control efforts, FEHD will continue to strengthen mosquito prevention and control and organize the Anti-mosquito Campaign 2017 (Phase II) for ten consecutive weeks from 24.4.2017 to 30.6.2017.

6. The Anti-mosquito Campaign 2017 (Phase II) to be carried out under the slogan “**Prevent Japanese Encephalitis and Dengue Fever Act Now!**” aims to achieve the following objectives -

- (a) To heighten public awareness of the potential risk of dengue fever, Zika virus infection, Japanese encephalitis, chikungunya fever and other mosquito-borne diseases;
- (b) To encourage community participation and forge close partnership of government departments concerned in mosquito prevention and control work; and
- (c) To eliminate potential mosquito breeding sites.

### **Mosquito Control Operations**

7. FEHD will carry out a series of operations focusing on removal of accumulation of water and mosquito prevention and control from 24.4.2017 to 30.6.2017 at mosquito breeding and potential breeding places in the district. Emphasis will be placed on locations in close proximity to human residences, schools, construction sites, public housing estates, hospitals, illegal cultivation sites, waterfront public and private cargo working areas, typhoon shelters and public piers. Please refer to **Annex II** for the action plan.

8. During the Campaign period, Pest Control Section of this district will deploy a total of three Sai Kung pest control teams to perform mosquito

prevention and control work in accordance with the attached action plan and take the opportunity to offer knowledge and technical advice on the prevention and control of mosquito to the public.

### **Education and Publicity**

9. On publicity and education fronts, FEHD will adopt the following measures in addition to arranging press releases, television and radio announcements in the public interest -

- (a) To produce publicity posters, pamphlets, banners and educational materials on prevention and control of mosquito for public circulation;
- (b) To distribute publicity materials widely through close liaison with the relevant government departments and local organizations to arouse public awareness of mosquito prevention and control;
- (c) To disseminate messages on mosquito prevention and control by broadcasting van;
- (d) To organize roving exhibitions at major shopping malls of housing estates and outreaching health talks for schools and management of housing estates;
- (e) To hold thematic exhibitions at the FEHD Health Education Exhibition and Resource Centre, and to include relevant information in the FEHD homepage; and
- (f) To disseminate messages on mosquito prevention and control through the Facebook of Keep Clean Ambassador “Ah Tak”.

10. To ensure smooth implementation of the Campaign, the Pest Control Advisory Section of the department would provide technical assistance in the mosquito prevention and control operations and the related publicity and education activities.

### **Local Participation**

11. To enlist support and active participation of this District Council in the Campaign, District Council Members and Committee Members will be invited to participate in related events, organize publicity activities and at the same time, to offer views on the mosquito prevention and control work.
