

Request for installation of a lift to connect Mosque Junction and the existing overhead escalator at Robinson Road

Reply from the Fire Services Department is shown below:

From Fire Services Department's operational point of view, there is no objection in principle to the proposal for installation of an elevator at corner of pavement, Mosque Junction (near J/O Peel Street), provided that the proposed elevator or any part thereof should under no circumstances hamper the Fire Services Department in discharging rescue and fire-fighting duties, such as causing obstruction to any building fire service inlets, fire escape routes, street hydrants or emergency vehicular accesses in the vicinity.
