

Circulation Paper

Food and Environmental Hygiene Department First Phase of Anti-rodent Campaign 2024 in Central & Western District

Purpose

To brief Members on the arrangements and details of the First Phase of Anti-rodent Campaign 2024 to be launched by the Food and Environmental Hygiene Department (FEHD) in Central & Western District.

Background

2. The Second Phase of Anti-rodent Campaign 2023 organised by FEHD was launched from 3.7.2023 to 8.9.2023. Actions taken in the district and the results of the Campaign are detailed at **Annex I**.

3. With a view to sustaining anti-rodent measures, FEHD is going to launch the Anti-rodent Campaign 2024, under the slogan “Prevent Disease Eliminate Rodent Nuisance”, in two phases as follows -

(a) First Phase : 8.1.2024 to 15.3.2024

(b) Second Phase: : 8.7.2024 to 13.9.2024

First Phase of Anti-rodent Campaign

4. The First Phase of Anti-rodent Campaign is to be launched from 8.1.2024 to 15.3.2024 targeting at markets/ municipal services buildings, hawker bazaars, typhoon shelters, lanes adjacent to food premises and other problematic spots as well as their surroundings. The objectives of this phase are –

(a) To arouse public awareness on the significance of rodent prevention and control in the community;

- (b) To promote participation of the public in rodent prevention and control work in their premises; and
- (c) To reduce the rodent population in the territory, particularly in the target areas and their peripheries.

5. Poor environmental hygiene, improper handling and disposal of refuse, structural defects and inadequate rodent proofing are the major causes of rodent infestation in markets/ municipal services buildings, hawker bazaars, typhoon shelters, lanes adjacent to food premises and other rodent problematic spots. To prevent rodent infestation effectively, it is important to tackle the problem at root by eliminating the three survival conditions of rodents, namely food, harbourage and passages, meaning the elimination of food sources and hiding places of rodents, as well as blockage of their passages. These problems will be addressed during the First Phase of Anti-rodent Campaign 2024 with a view to raising awareness of the people living or working in those problematic areas on the importance of proper rodent prevention and control. Besides, rodent prevention and control work will be strengthened in areas where rodent activities were detected during the Rodent Infestation Survey in the second half of 2023. Publicity education will also be strengthened in those areas.

Action Plan

6. During the Campaign period, our in-house and pest control contractors' staff will, in accordance with the action plan at Annex II, carry out systematic rodent surveys and disinfestation work in the target areas, and public places in their vicinity, such as vacant lands, sewers, flower beds, refuse collection points, etc, as well as other rodent problematic spots. Poisonous baits or rodent traps will be set whenever signs of rodent infestation are detected. At the same time, staff of our Hawkers, Markets and Cleansing Sections will step up inspections of markets/ municipal services buildings, hawker bazaars, typhoon shelters, lanes adjacent to food premises and other problematic spots in the target areas, and to augment rodent prevention and control work in those areas.

7. To intensify rodent prevention and control work in the district, we have taken into account factors including Rodent Infestation Rates, the number of rodent complaints received, views of the local community and the number of food premises and "three-nil" buildings in identifying suitable locations in each district to carry out targeted rear lane anti-rodent operations (Please refer to Annex III). Adopting multi-

pronged strategies and the concept of rodent disinfestation in designated target areas, we carry out targeted rodent prevention and control work through elimination of the three basic survival conditions of rodents, namely food, harbourage and passages, including improving environmental hygiene, stepping up rodent disinfestation and enforcement actions. Pest Control, Cleansing, Environmental Hygiene, Markets and Hawkers Sections of FEHD will carry out strategic anti-rodent operations on various fronts with a view to eliminating the food sources and hiding places of rodents, as well as blocking their passages. Apart from stepping up anti-rodent work, we will enhance street cleansing services in target rear lanes, including sweeping and washing streets and rear lanes, removing refuse and waste, emptying and washing litter containers as well as clearing miscellaneous articles and refuse from markets and hawker bazaar stalls in the target rear lanes and their vicinity, so as to keep the environment clean.

8. In addition, to enhance the effectiveness of anti-rodent work in target rear lanes, we will step up inspections of food premises and enforcement actions against food premises causing poor environmental hygiene conditions, food preparation and scullery in rear lanes and improper handling and disposal of rubbish, etc. We will adopt a zero-tolerance approach against common public cleanliness offences and take stringent enforcement actions against illegal disposal of refuse and waste.

9. To increase public knowledge about rodent control and elimination in rear lanes, we will also step up public education and publicity. We will collaborate with the District Councils and District Offices of the Home Affairs Department to organise anti-rodent promotional activities and arrange health talks for building management offices of private buildings, persons-in-charge of food premises, and market and hawker stall operators to provide information and technical advice on rodent prevention and control.

10. Once the anti-rodent work in target rear lanes achieves positive results, we will extend the scope of such work to cover more places. The multi-pronged strategies and the concept of rodent disinfestation in designated target areas will continue to be adopted to eliminate the three basic survival conditions of rodents, namely food, harbourage and passages so as to enhance the effectiveness of the Anti-rodent Campaign.

11. Relevant government departments including the Housing Department, the Leisure and Cultural Services Department, the Home Affairs Department, the Highways Department, the Agriculture, Fisheries and Conservation Department, the Drainage

Services Department, the Lands Department and the Marine Department, etc. will be / have been notified of the First Phase of Anti-rodent Campaign 2024 and invited to take appropriate actions in rodent prevention and control in areas under their respective ambit.

Publicity and Education

12. Effective rodent prevention and control hinges on the active participation and support of the community in anti-rodent work, especially in maintaining environmental hygiene, proper handling and disposal of rubbish, repairing damaged building fittings and taking rodent-proofing measures, etc. Hence, on publicity and education fronts, the department will adopt the following measures in addition to arranging television and radio announcements in public interests -

- (a) To produce publicity posters, pamphlets, banners and educational materials on rodent prevention and control for public circulation;
- (b) To enhance and maintain close liaison with the relevant government departments and local organisations;
- (c) To distribute publicity materials to the public;
- (d) To organise thematic talks on rodent prevention and control and ectoparasites of rodent for stall tenants and the management of the public markets;
- (e) To organise roving exhibitions at major shopping malls of housing estates and outreaching health talks for students and management of housing estates;
- (f) To disseminate messages on rodent prevention and control to various stakeholders of the target rear lanes and organise health talks to provide them with information and technical advice on rodent prevention and control;
- (g) To hold thematic exhibitions at the FEHD Health Education Exhibition and Resource Centre, and include information of the Campaign in the FEHD homepage; and
- (h) To disseminate messages on rodent prevention and control through the

Facebook and the Instagram of Keep Clean Ambassador 「Ah Tak」.

13. To ensure smooth implementation of the Campaign, the Pest Control Advisory Section of the department would provide technical assistance in the rodent prevention and control operations and the related publicity and education activities.

Local Participation

14. To enlist support and active participation of the District Council in the Campaign, Council Members and Committee Members will be invited to participate in related events, organise publicity activities and offer views on the rodent prevention and control work.

**Food and Environmental Hygiene Department
Second Phase of Anti-rodent Campaign 2023 in Central & Western District**

The Second Phase of the Anti-rodent Campaign 2023 was launched between 3.7.2023 and 8.9.2023. During the period, related rodent prevention and control measures were implemented smoothly. The actions and results of the Second Phase of Anti-rodent Campaign 2023 in the district were as follows:

1. Number of patrols conducted at target areas : 762
2. Number of rat cages and traps placed : 1 390
3. Number of rodent poison treatment operations conducted : 4 570
4. Number of live rodents trapped : 278
5. Number of dead rodents collected : 255
6. Number of rat holes filled : 31
7. Number of advice on rodent prevention given to members of the public : 262
8. Number of leaflets/posters distributed : 1 850 / 470
9. Number of publicity/promotion activities conducted : 6
