

Question on the Hong Kong International Airport

(Paper T&TC 26/2016)

and

Question on takeoff and landing schedules of flights at the Hong Kong International Airport

(Paper T&TC 28/2016)

Written reply of Civil Aviation Department

The Civil Aviation Department (CAD) understands that the Airport Authority Hong Kong (AAHK) is exploring the feasibility of increasing aircraft movements of the Hong Kong International Airport. Related information will be provided by the AAHK.

The CAD is conscious of the impact of aircraft noise on the community and has implemented a series of noise mitigating measures to alleviate the impact. The CAD will continue to closely monitor the latest development of the ICAO, the international aviation industry and the operation of the Hong Kong International Airport; and will continue our efforts to implement the aircraft noise mitigating measures.

Thank you for your attention to this matter.
