

Consultation of Draft Tin Fu Tsai Outline Zoning Plan No. S/TM-TFT/B

1. Purpose

The purpose of this paper is to consult the Tuen Mun District Council on the draft Tin Fu Tsai Outline Zoning Plan No. S/TM-TFT/B together with its Notes and Explanatory Statement (the draft Plan).

2. Background

- 2.1 As pledged in the 2010-2011 Policy Address, the Government will either include the sites encircled by Country Parks into Country Parks, or determine their proper uses through statutory planning in order to meet conservation and social development needs.
- 2.2 On 7.1.2011, the draft Tin Fu Tsai Development Permission Area (DPA) Plan No. DPA/TM-TFT/1 was exhibited for public inspection under the Town Planning Ordinance (the Ordinance). On 16.12.2011, the approved Tin Fu Tsai DPA Plan No. DPA/TM-TFT/2 was exhibited for public inspection under the Ordinance. The Tin Fu Tsai DPA Plan is valid for 3 years until 7.1.2014.
- 2.3 The draft Plan is to replace the current approved Tin Fu Tsai DPA Plan No. DPA/TM-TFT/2 before its expiry.

3. Planning Scheme Area

- 3.1 The planning scheme area (the Area) is located at Tin Fu Tsai and covers an area of about 54.50 ha. It is completely encircled by Tai Lam Country Park. It is about 1.7 kilometres (km) to the southwest of Ho Pui Irrigation Reservoir, and about 1.8 km to the east of the upper end of Tai Lam Chung Reservoir and Kat Hing Bridge (**Plan 1**). Tai Lam Tunnel runs through the western part of the Area underground in a north-south direction. The Area falls mainly within the Tuen Mun district, and partly within the Yuen Long district (**Plan 2**). The current condition of the Area is shown on **Plan 3**. The boundary of the Area is shown by a heavy broken line on the draft Plan.
- 3.2 The Area is within a gazetted water gathering ground (**Plan 4**). According to the Water Supplies Department, the water gathering ground in which the Area locates is classified as upper direct water gathering ground of Tai Lam Chung Reservoir, where water would flow into the reservoir direct. Tai Lam Chung Reservoir is a very important reservoir in Hong Kong and pollution of this reservoir will have serious consequences. New development within the Area should be strictly controlled in order to avoid any possible water pollution so as to safeguard the quality of the water sources of the Area. According to the Environmental Protection Department, in general the use of septic tank and soakaway systems for sewage treatment and disposal are not considered acceptable for new village type developments within water gathering ground, especially for sites in close proximity to existing stream courses. For

redevelopment/rebuilding in the area, the sewage disposal facilities will have to comply with the requirements of the Environmental Protection Department.

- 3.3 According to the Agriculture, Fisheries and Conservation Department, the habitats in the northwestern part of the Area are largely natural. A wooded area to the north of an ancestral hall is dominated by *Celtis sinensis* and *Machilus pauhoi* and believed to be the remnant of a 'fung shui' wood. Numerous individuals of *Pavetta hongkongensis*, which is a species protected under the Forests and Countryside Ordinance (Cap. 96), are also recorded there. Although the understory has been disturbed and signs of war game are noted, the ecological value of the wooded area should recover overtime. This wooded area is of higher conservation value (**Plan 3**).

4. General Planning Intention

The Area is completely encircled by Tai Lam Country Park and is rural and natural in character. It forms an integral part of the natural habitats/system of the adjoining Tai Lam Country Park. The general planning intention for the Area is to conserve the natural habitats, landscape resources and rural and natural character of the Area. Developments which would cause adverse impacts on the water quality and water resources of the water gathering ground are not encouraged.

5. Land Use Zonings

- 5.1 "Conservation Area" – Total area: about 1.07 ha

A wooded area with higher conservation value in the northwestern part of the Area is within this zone.

- 5.2 "Green Belt" – Total area: about 53.43 ha

Apart from the wooded area with higher conservation value in the northwestern part of the Area, all areas are within this zone. This zone mainly covers areas of steep slopes, and with dense vegetation and natural streams. It also serves as a buffer to Tai Lam Country Park.

- 5.3 Although there is no "Village Type Development" zone on the draft Plan, according to the covering Notes of the draft Plan, rebuilding of New Territories Exempted House (including Small House) and replacement of existing domestic building by New Territories Exempted House (including Small House) within "Green Belt" zone are always permitted.

6. Consultation

Members of the Tuen Mun District Council are invited to express views on the draft Plan.

7. Next Step

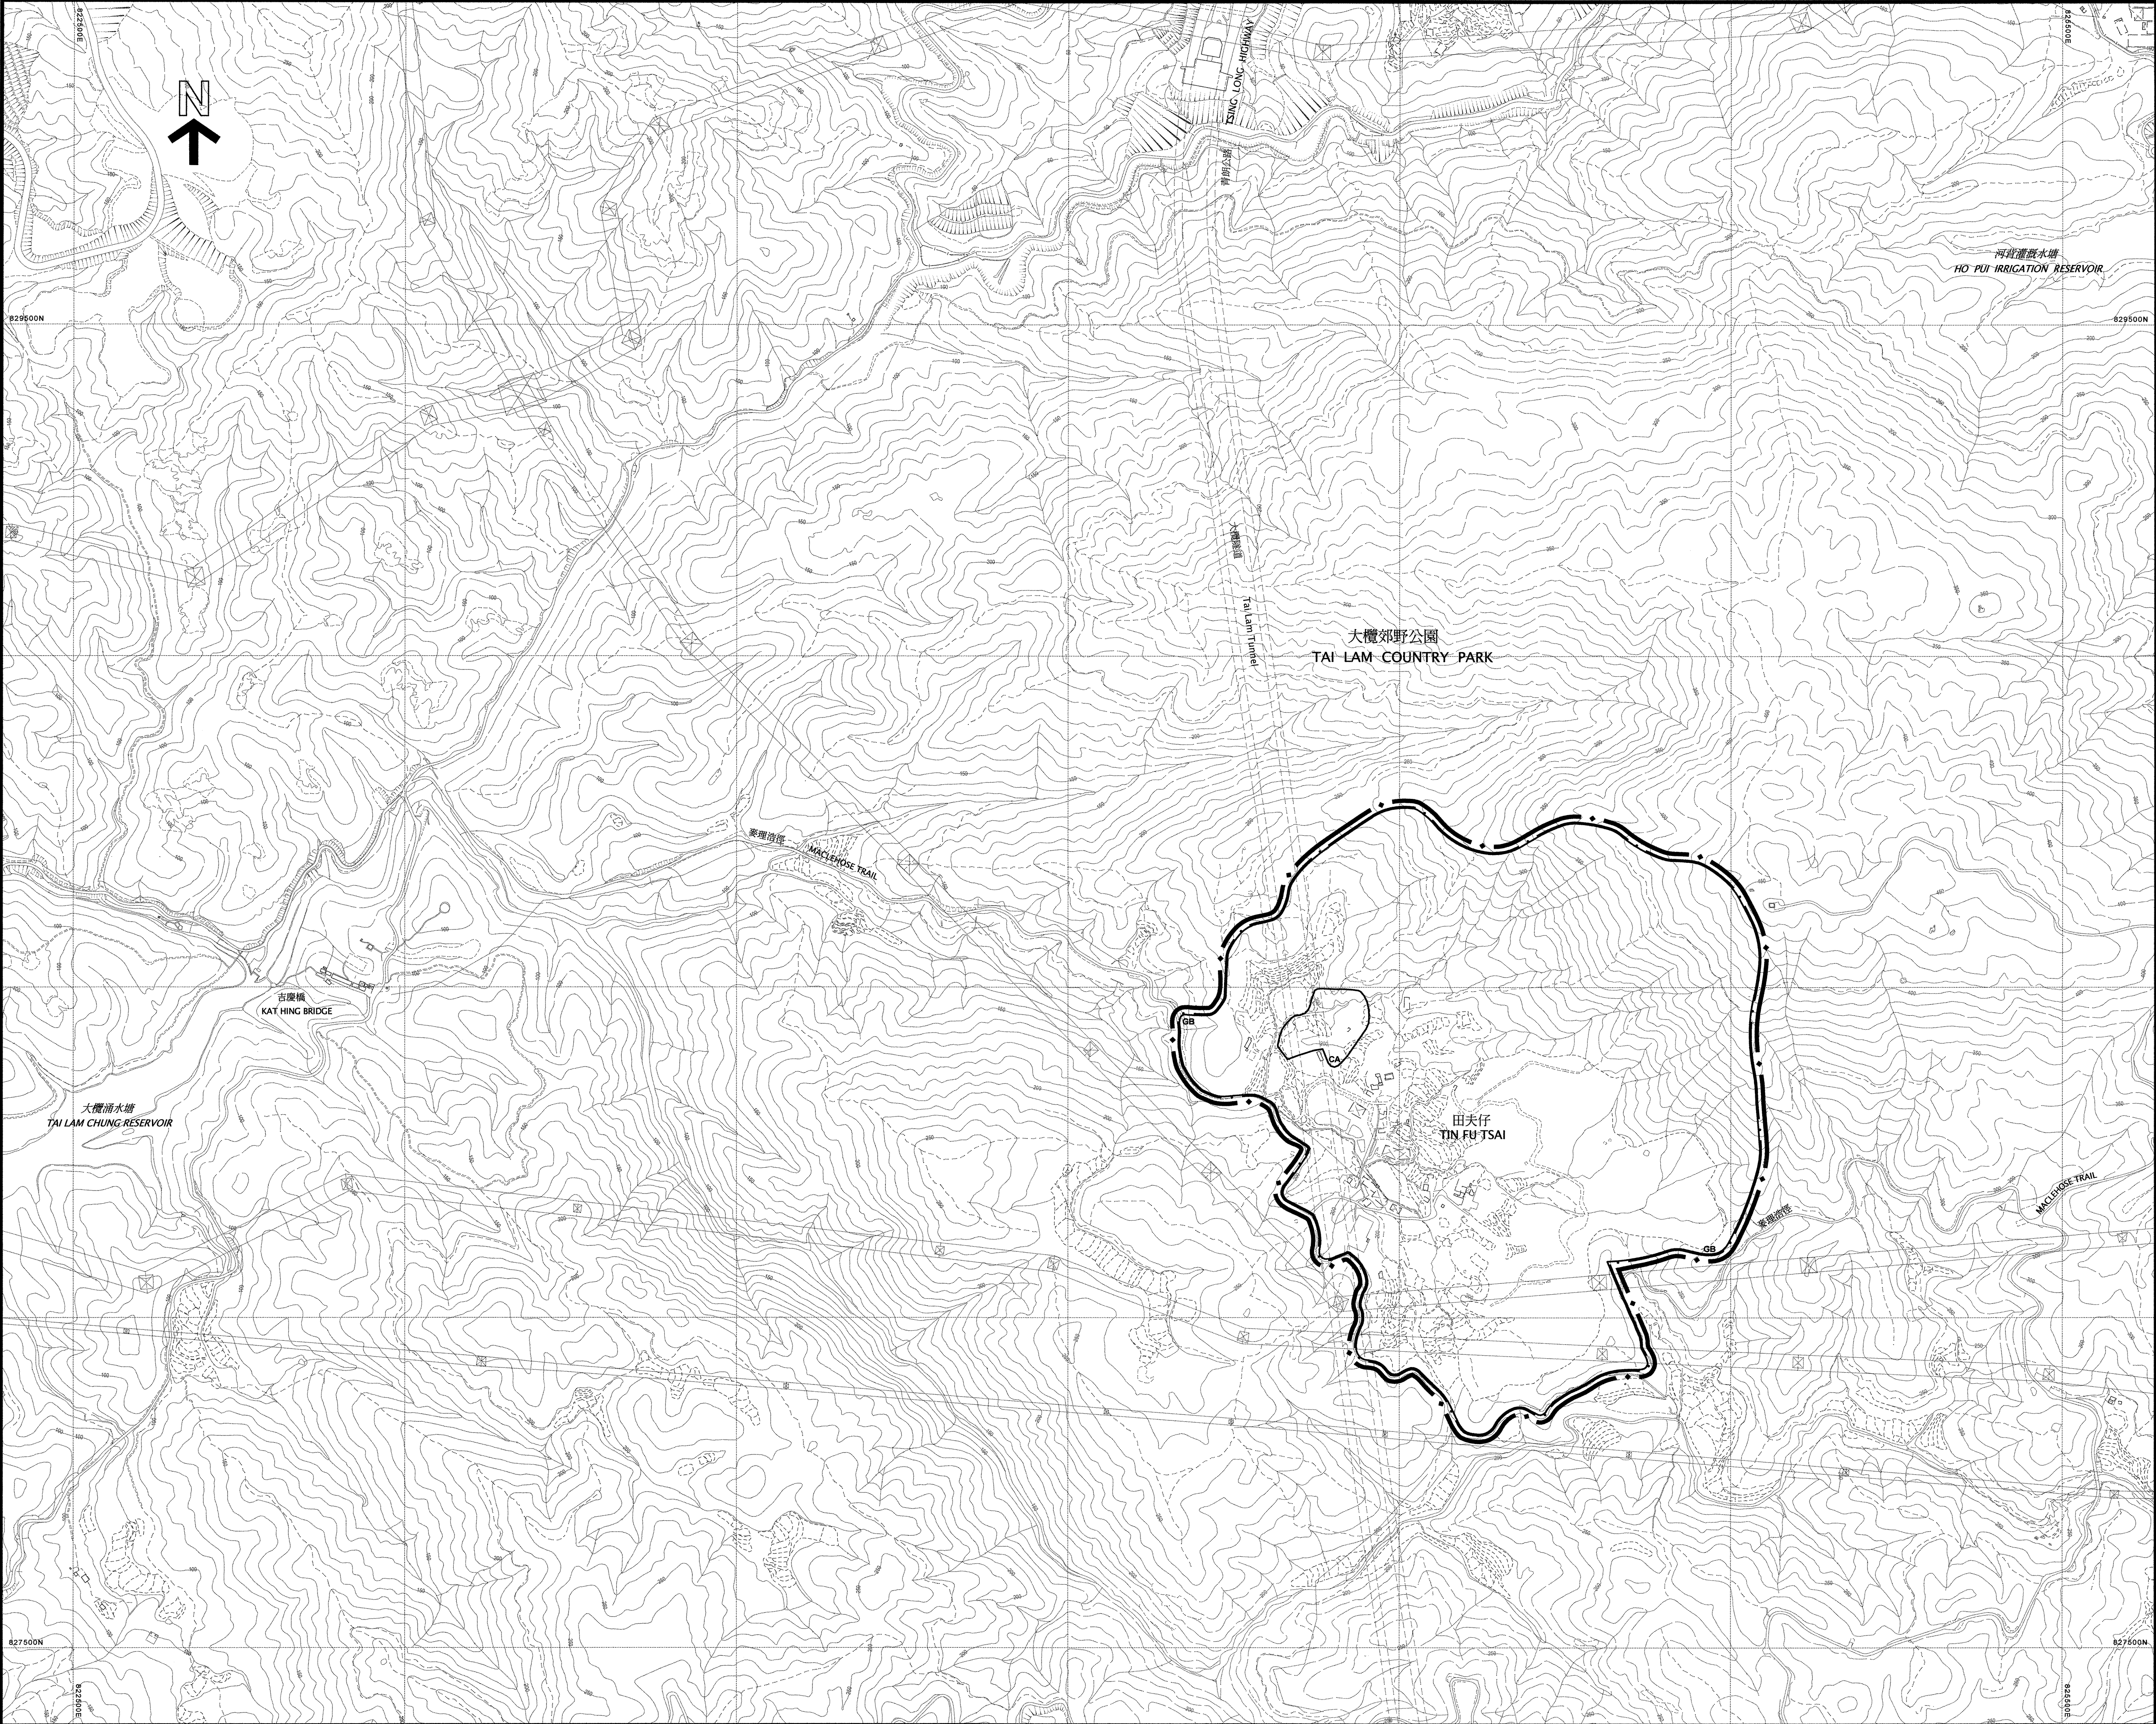

The Planning Department will report the views of the Tuen Mun District Council to the Town Planning Board for further consideration of the draft Plan.

DRAFT TIN FU TSAI OUTLINE ZONING PLAN NO. S/TM-TFT/B

(Being a Draft Plan for the Purposes of the Town Planning Ordinance)

NOTES

(N.B. These form part of the Plan.)

- (1) These Notes show the uses or developments on land falling within the boundaries of the Plan which are always permitted and which may be permitted by the Town Planning Board, with or without conditions, on application. Where permission from the Town Planning Board for a use or development is required, the application for such permission should be made in a prescribed form. The application shall be addressed to the Secretary of the Town Planning Board, from whom the prescribed application form may be obtained.
- (2) Any use or development which is always permitted or may be permitted in accordance with these Notes must also conform to any other relevant legislation, the conditions of the Government lease concerned, and any other Government requirements, as may be applicable.
- (3) No action is required to make the use of any land or building which was in existence immediately before the first publication in the Gazette of the notice of the draft development permission area plan conform to this Plan, provided such use has continued since it came into existence. Any material change of such use or any other development (except minor alteration and/or modification to the development of the land or building in respect of such use which is always permitted) must be always permitted in terms of the Plan or in accordance with a permission granted by the Town Planning Board.
- (4) A use or development of any land or building permitted under an earlier draft or approved plan including development permission area plan for the area and effected or undertaken during the effective period of that plan is always permitted under this Plan. Any material change of such use or any other development (except minor alteration and/or modification to the completed development of the land or building which is always permitted) must be always permitted in terms of the Plan or in accordance with a permission granted by the Town Planning Board.
- (5) Except to the extent that paragraph (3) or (4) applies, any use or development falling within the boundaries of the Plan and also within the boundaries of the draft development permission area plan, unless always permitted in terms of the Plan, shall not be undertaken or continued on or after the date of the first publication in the Gazette of the notice of the draft development permission area plan without permission from the Town Planning Board.
- (6) Except as otherwise specified by the Town Planning Board, when a use or material change of use is effected or a development or redevelopment is undertaken, as always permitted in terms of the Plan or in accordance with a permission granted by the Town Planning Board, all permissions granted by the Town Planning Board in respect of the site of the use or material change of use or development or redevelopment shall lapse.

- (7) Boundaries between zones may be subject to minor adjustments as detailed planning proceeds.
- (8) The following uses or developments are always permitted on land falling within the boundaries of the Plan except (a) where the uses or developments are specified in Column 2 of the Notes of individual zones or (b) as provided in paragraph (9) in relation to areas zoned “Conservation Area”:
 - (a) maintenance, repair or demolition of a building;
 - (b) provision, maintenance or repair of plant nursery, amenity planting, open space, rain shelter, refreshment kiosk, footpath, bus/public light bus stop or lay-by, cycle track, taxi rank, public utility pipeline, electricity mast, lamp pole, telephone booth, telecommunications radio base station, automatic teller machine and shrine;
 - (c) maintenance or repair of road, watercourse, nullah, sewer and drain;
 - (d) geotechnical works, local public works, road works, sewerage works, drainage works, environmental improvement works, marine related facilities and waterworks (excluding works on service reservoir) and such other public works co-ordinated or implemented by Government;
 - (e) rebuilding of New Territories Exempted House;
 - (f) replacement of an existing domestic building i.e. a domestic building which was in existence on the date of the first publication in the Gazette of the notice of the draft development permission area plan, by a New Territories Exempted House; and
 - (g) provision, maintenance or repair of a grave of an indigenous New Territories villager or a locally based fisherman and his family members for which permission has been obtained from Government.
- (9) In areas zoned “Conservation Area”,
 - (a) the following uses or developments are always permitted:
 - (i) maintenance or repair of plant nursery, amenity planting, sitting out area, rain shelter, refreshment kiosk, road, watercourse, nullah, public utility pipeline, electricity mast, lamp pole, telephone booth, shrine and grave;
 - (ii) geotechnical works, local public works, road works, sewerage works, drainage works, environmental improvement works, marine related facilities, waterworks (excluding works on service reservoir) and such other public works co-ordinated or implemented by Government; and
 - (iii) provision of amenity planting by Government; and

- (b) the following uses or developments require permission from the Town Planning Board:

provision of plant nursery, amenity planting (other than by Government), sitting out area, rain shelter, refreshment kiosk, footpath, public utility pipeline, electricity mast, lamp pole, telephone booth and shrine.

- (10) (a) Except in areas zoned “Conservation Area”, temporary use or development of any land or building not exceeding a period of two months is always permitted provided that no site formation (filling or excavation) is carried out and that the use or development is a use or development specified below:

structures for carnivals, fairs, film shooting on locations, festival celebrations, religious functions or sports events.

- (b) Except as otherwise provided in paragraph (10)(a), and subject to temporary uses for open storage and port back-up purposes which are prohibited in areas zoned “Conservation Area”, temporary use or development of any land or building not exceeding a period of three years requires permission from the Town Planning Board. Notwithstanding that the use or development is not provided for in terms of the Plan, the Town Planning Board may grant permission, with or without conditions, for a maximum period of three years, or refuse to grant permission.

- (c) Temporary use or development of land or building exceeding three years requires permission from the Town Planning Board in accordance with the terms of the Plan.

- (11) Unless otherwise specified, all building, engineering and other operations incidental to and all uses directly related and ancillary to the permitted uses and developments within the same zone are always permitted and no separate permission is required.

- (12) In these Notes, unless the context otherwise requires or unless as expressly provided below, terms used in the Notes shall have the meanings as assigned under section 1A of the Town Planning Ordinance.

“Existing building” means a building, including a structure, which is physically existing and is in compliance with any relevant legislation and the conditions of the Government lease concerned.

“New Territories Exempted House” means a domestic building other than a guesthouse or a hotel; or a building primarily used for habitation, other than a guesthouse or a hotel, the ground floor of which may be used as ‘Shop and Services’ or ‘Eating Place’, the building works in respect of which are exempted by a certificate of exemption under Part III of the Buildings Ordinance (Application to the New Territories) Ordinance (Cap. 121).

(Please see next page)

GREEN BELT (Cont'd)

Planning Intention

The planning intention of this zone is primarily for defining the limits of urban and sub-urban development areas by natural features and to contain urban sprawl as well as to provide passive recreational outlets. There is a general presumption against development within this zone.

Remarks

Any diversion of stream, filling of land/pond or excavation of land, including that to effect a change of use to any of those specified in Columns 1 and 2 above or the uses or developments always permitted under the covering Notes (except public works co-ordinated or implemented by Government, and maintenance, repair or rebuilding works), shall not be undertaken or continued on or after the date of the first publication in the Gazette of the notice of the draft development permission area plan without the permission from the Town Planning Board under section 16 of the Town Planning Ordinance.

CONSERVATION AREA

Column 1 Uses always permitted	Column 2 Uses that may be permitted with or without conditions on application to the Town Planning Board
Agricultural Use (other than Plant Nursery) Nature Reserve Nature Trail On-Farm Domestic Structure Wild Animals Protection Area	Field Study/Education/Visitor Centre Government Refuse Collection Point Government Use (not elsewhere specified) House (Redevelopment only) Public Convenience Public Utility Installation Radar, Telecommunications Electronic Microwave Repeater, Television and/or Radio Transmitter Installation

Planning Intention

This zoning is intended to protect and retain the existing natural landscape, ecological or topographical features of the area for conservation, educational and research purposes and to separate sensitive natural environment such as Country Park from the adverse effects of development.

There is a general presumption against development in this zone. In general, only developments that are needed to support the conservation of the existing natural landscape or scenic quality of the area or are essential infrastructure projects with overriding public interest may be permitted.

Remarks

- (a) No redevelopment, including alteration and/or modification, of an existing house shall result in a total redevelopment in excess of the plot ratio, site coverage and height of the house which was in existence on the date of the first publication in the Gazette of the notice of the draft development permission area plan.
- (b) Any diversion of stream, filling of land/pond or excavation of land, including that to effect a change of use to any of those specified in Columns 1 and 2 above or the uses or developments always permitted under the covering Notes, shall not be undertaken or continued on or after the date of the first publication in the Gazette of the notice of the draft development permission area plan without the permission from the Town Planning Board under section 16 of the Town Planning Ordinance.

DRAFT TIN FU TSAI OUTLINE ZONING PLAN NO. S/TM-TFT/B

(Being a Draft Plan for the Purposes of the Town Planning Ordinance)

EXPLANATORY STATEMENT

Note: For the purposes of the Town Planning Ordinance, this statement shall not be deemed to constitute a part of the Plan.

1. INTRODUCTION

This Explanatory Statement is intended to assist an understanding of the draft Tin Fu Tsai Outline Zoning Plan No. S/TM-TFT/B. It reflects the planning intention and objectives of the Town Planning Board (the Board) for the Plan.

2. AUTHORITY FOR THE PLAN AND PROCEDURE

- 2.1 On 13 December 2010, under the power delegated by the Chief Executive, the Secretary for Development directed the Board, under section 3(1)(b) of the Town Planning Ordinance (the Ordinance), to prepare a draft plan designating the Tin Fu Tsai area as a development permission area (DPA).
- 2.2 On 7 January 2011, the draft Tin Fu Tsai DPA Plan No. DPA/TM-TFT/1 was exhibited for public inspection under section 5 of the Ordinance.
- 2.3 On 6 December 2011, the Chief Executive in Council (CE in C), under section 9(1)(a) of the Ordinance, approved the draft Tin Fu Tsai DPA Plan, which was subsequently renumbered as DPA/TM-TFT/2. On 16 December 2011, the approved Tin Fu Tsai DPA Plan No. DPA/TM-TFT/2 was exhibited for public inspection under section 9(5) of the Ordinance.
- 2.4 On 30 January 2013, under the power delegated by the Chief Executive, the Secretary for Development directed the Board, under section 3(1)(a) of the Ordinance, to prepare an outline zoning plan for the Tin Fu Tsai area.
- 2.5 On _____ 2013, the draft Tin Fu Tsai Outline Zoning Plan No. S/TM-TFT/B (the Plan) was exhibited for public inspection under section 5 of the Ordinance.

3. OBJECT OF THE PLAN

- 3.1 The object of the Plan is to indicate the broad land use zonings for Tin Fu Tsai area so that development and redevelopment within the area can be put under statutory planning control. It also provides the planning framework for preparing more detailed non-statutory plans which form the basis for public works planning and site reservation for various uses.
- 3.2 The Plan is to illustrate the broad principles of development and control only. It is a small scale plan and the boundaries between the land use zones may be subject to minor adjustments as detailed planning proceeds.

4. NOTES OF THE PLAN

- 4.1 Attached to the Plan is a set of Notes which shows the types of uses or developments which are always permitted within the planning scheme area and which may be permitted by the Board, with or without conditions, on application. The provision for application for planning permission under section 16 of the Ordinance allows greater flexibility in land use planning and control of developments to meet the changing needs.
- 4.2 For the guidance of the general public, a set of definitions that explains some of the terms used in the Notes may be obtained from the Technical Services Division of the Planning Department and can be downloaded from the Board's website at <http://www.info.gov.hk/tpb>.

5. THE PLANNING SCHEME AREA

- 5.1 The planning scheme area (the Area) is located at Tin Fu Tsai and covers an area of about 54.50 ha. It is completely encircled by Tai Lam Country Park. It is about 1.7 kilometres (km) to the southwest of Ho Pui Irrigation Reservoir, and about 1.8 km to the east of the upper end of Tai Lam Chung Reservoir and Kat Hing Bridge. Tai Lam Tunnel runs through the western part of the Area underground in a north-south direction. The Area falls mainly within the Tuen Mun district, and partly within the Yuen Long district. The boundary of the Area is shown by a heavy broken line on the Plan.
- 5.2 The Area is rural and natural in character. It is surrounded by vegetated hill slopes of Tai Lam Country Park. The eastern, southern and central parts of the Area mainly comprise flat or gently sloping land with orchards/planted trees and some fallow agricultural land covered with trees, shrubs and grass. The western part of the Area comprises gentle slopes with trees at the periphery. In the northwestern part of the Area, along the toe of the hill slopes is a woodland, and some of the trees are on previously fallow agricultural land. The woodland extends to the upper and steeper hill slopes in the northwestern part of the Area. The northern and northeastern parts of the Area comprise steeper naturally vegetated hill slopes rising to a higher altitude. The higher hill slopes are generally covered by shrubs and grass, while trees concentrate at the toe of these hill slopes and along the streams flowing down these slopes. These streams converge to a west-flowing branched watercourse near the central and at the southwestern parts of the Area. A few ponds are near the watercourse at the southwestern part of the Area. The southwestern part of the Area has generally been used for an outdoor training centre. Some war game areas stretch from the southwestern part to the northwestern part of the Area. A few village type houses are in the Area. Some cultivated land is at the southwestern part of the Area. An ancestral hall is in the northwestern part of the Area.
- 5.3 Tin Fu Chai (as per the List of Recognized Villages under the New Territories Small House Policy published by the Lands Department), a pre-1898 recognized village, is located within the Area.

- 5.4 The Area is within a gazetted water gathering ground. According to the Water Supplies Department, the water gathering ground in which the Area locates is classified as upper direct water gathering ground of Tai Lam Chung Reservoir, where water would flow into the reservoir direct. Part of a permitted burial ground is at the northwestern periphery of the Area. In recognition of the traditional burial right of indigenous villagers, that part of burial ground within the Area has been preserved.

6. POPULATION

According to the estimate of the Planning Department, the population of the Area in 2013 is about 20 persons.

7. OPPORTUNITIES AND CONSTRAINTS

7.1 Opportunities

- 7.1.1 The Area is of rural and natural character and with high landscape value and tranquil environment. According to the Landscape Value Mapping of Hong Kong (2005), the Area is of upland countryside landscape character and the landscape value of the Area is generally rated “High” and “High (Qualified)”. Opportunities should be taken to preserve the rural and natural character as well as the landscape of the Area.
- 7.1.2 According to the Agriculture, Fisheries and Conservation Department, the habitats in the northwestern part of the Area are largely natural. A wooded area to the north of an ancestral hall is dominated by *Celtis sinensis* and *Machilus pauhoi* and believed to be the remnant of a ‘fung shui’ wood. Numerous individuals of *Pavetta hongkongensis*, which is a species protected under the Forests and Countryside Ordinance (Cap. 96), are also recorded there. Although the understory has been disturbed and signs of war game are noted, the ecological value of the wooded area should recover overtime. This wooded area is of higher conservation value. There is an opportunity to conserve the natural habitats and the wooded area in the northwestern part of the Area.
- 7.1.3 In addition, other areas with dense tree cover, especially at the periphery of the Area, and the vegetated hillsides with natural streams and diverse aquatic vegetation should be protected as advised by the Agriculture, Fisheries and Conservation Department.

7.2 Constraints

- 7.2.1 The Area is completely encircled by Tai Lam Country Park. The vehicular access to the Area is through Tai Lam Forest Track, which is a restricted road managed by the Agriculture, Fisheries and Conservation Department. The section of Tai Lam Forest Track near the Area also forms a section of MacLehose Trail and mountain bike

trail for recreation purposes. The section of Tai Lam Forest Track concerned is narrow and without footway. Increased vehicular traffic would cause conflict with the recreation use and safety concerns.

- 7.2.2 The Area is not provided with public water supplies, drainage and sewerage systems. Uses and developments within the Area should pay due regard to these infrastructure constraints.
- 7.2.3 The Area is within an upper direct water gathering ground of Tai Lam Chung Reservoir. According to the Water Supplies Department, Tai Lam Chung Reservoir is a very important reservoir in Hong Kong and pollution of this reservoir will have serious consequences. New development within the Area should be strictly controlled in order to avoid any possible water pollution so as to safeguard the quality of the water sources of the Area. According to the Environmental Protection Department, in general the use of septic tank and soakaway systems for sewage treatment and disposal are not considered acceptable for new village type developments within water gathering ground, especially for sites in close proximity to existing stream courses.
- 7.2.4 There is natural terrain around the Area. Natural terrain is also present in the northern and northeastern parts of the Area. These parts of the Area also comprise steep natural hillsides with past occurrence of landslides. Developments in these parts of the Area are potentially subject to natural terrain hazards. Natural terrain hazard study may be required and suitable hazard mitigation measures shall be provided, if found necessary, as part of the developments. For developments to be located only on the relatively flat areas close to these steep natural hillsides, it is considered that natural terrain hazard study should be extended to cover the steep natural hillsides.
- 7.2.5 There are 400 kV overhead power lines at the southern part of the Area. Uses and developments within the Area should pay due regard to the high voltage overhead power lines.
- 7.2.6 Tai Lam Tunnel runs in a generally north-south direction across the western part of the Area. Uses and developments shall not affect Tai Lam Tunnel.
- 7.2.7 Part of a permitted burial ground is at the northwestern periphery of the Area and the remaining part of it is within Tai Lam Country Park. The area occupied by the burial ground is not suitable for development.

8. GENERAL PLANNING INTENTION

The Area is completely encircled by Tai Lam Country Park and is rural and natural in character. It forms an integral part of the natural habitats/system of the adjoining Tai Lam Country Park. The general planning intention for the Area is to conserve the natural habitats, landscape resources and rural and natural character of the Area.

Developments which would cause adverse impacts on the water quality and water resources of the water gathering ground are not encouraged.

9. **LAND USE ZONINGS**

9.1 **Green Belt (“GB”)**: Total area: 53.43 ha

- 9.1.1 The planning intention of this zone is primarily for defining the limits of urban and sub-urban development areas by natural features and to contain urban sprawl as well as to provide passive recreational outlets. There is a general presumption against development within this zone.
- 9.1.2 Apart from the wooded area with higher conservation value in the northwestern part of the Area, all areas are within this zone. This zone also covers part of a permitted burial ground intended to provide burial places for indigenous villagers, which is at the northwestern periphery of the Area.
- 9.1.3 Since there is a general presumption against development within this zone, development in this zone will be strictly controlled. Development proposals will be considered by the Board on individual merits taking into account the relevant Town Planning Board Guidelines.
- 9.1.4 As diversion of stream, filling of land/pond or excavation of land may cause adverse drainage impact on the adjacent areas and adverse impacts on the natural environment, permission from the Board is required for such activities except public works co-ordinated or implemented by Government, and maintenance, repair or rebuilding works.

9.2 **Conservation Area (“CA”)**: Total area: 1.07 ha

- 9.2.1 This zoning is intended to protect and retain the existing natural landscape, ecological or topographical features of the area for conservation, educational and research purposes and to separate sensitive natural environment such as Country Park from the adverse effects of development. There is a general presumption against development in this zone. In general, only developments that are needed to support the conservation of the existing natural landscape or scenic quality of the area or are essential infrastructure projects with overriding public interest may be permitted.
- 9.2.2 A wooded area in the northwestern part of the Area with dense trees is within this zone. According to the Agriculture, Fisheries and Conservation Department, the habitats in this area are largely natural. The wooded area within this zone is dominated by *Celtis sinensis* and *Machilus pauhoi* and believed to be the remnant of a ‘fung shui’ wood. Numerous individuals of *Pavetta hongkongensis*, which is a species protected under the Forests and Countryside Ordinance (Cap. 96), are

also recorded there. This wooded area is of higher conservation value.

9.2.3 New residential development is not permitted under this zone. Redevelopment of existing houses may be permitted on application to the Board. The redevelopment of existing houses shall not result in a total redevelopment in excess of the plot ratio, site coverage and height of the house which was in existence on the date of the first publication in the Gazette of the notice of the draft DPA plan.

9.2.4 Diversion of stream, filling of land/pond or excavation of land may cause adverse drainage impact on the adjacent areas and adverse impacts on the natural environment. In view of the conservation value of the area within this zone, permission from the Board is required for such activities.

10. TRANSPORT AND COMMUNICATION

Road Network and Footpath

The Area is accessible through the paved Tai Lam Forest Track. The track runs through Tai Lam Country Park and a section of it is along the southern and southwestern edges of the Area. Tai Lam Forest Track is a restricted vehicular access managed by the Agriculture, Fisheries and Conservation Department. The track also forms a section of the MacLehose Trail and mountain bike trail. In addition, there are waterworks access roads in the vicinity. The waterworks access roads are restricted vehicular accesses constructed and maintained by the Water Supplies Department solely for inspection and maintenance of waterworks. The waterworks access roads are not constructed to public road standard and the Water Supplies Department has no plan to upgrade or improve them.

11. UTILITY SERVICES

There are no public fresh/potable and salt water supplies to the Area. There are also no public drainage and sewerage systems in the Area. Electricity supply and limited fixed line telecommunication services are available in the Area. Town gas supply is not available.

12. IMPLEMENTATION

12.1 The Plan provides a broad land use framework for development control and implementation of planning proposals. More detailed plans would be prepared when required as a basis for public works planning and private developments.

12.2 At present there is no overall programme for the provision of infrastructure within the Area. The implementation process will be gradual and may stretch over a long period of time depending on the availability of resources. It will be undertaken through the participation of both the public and private sectors.

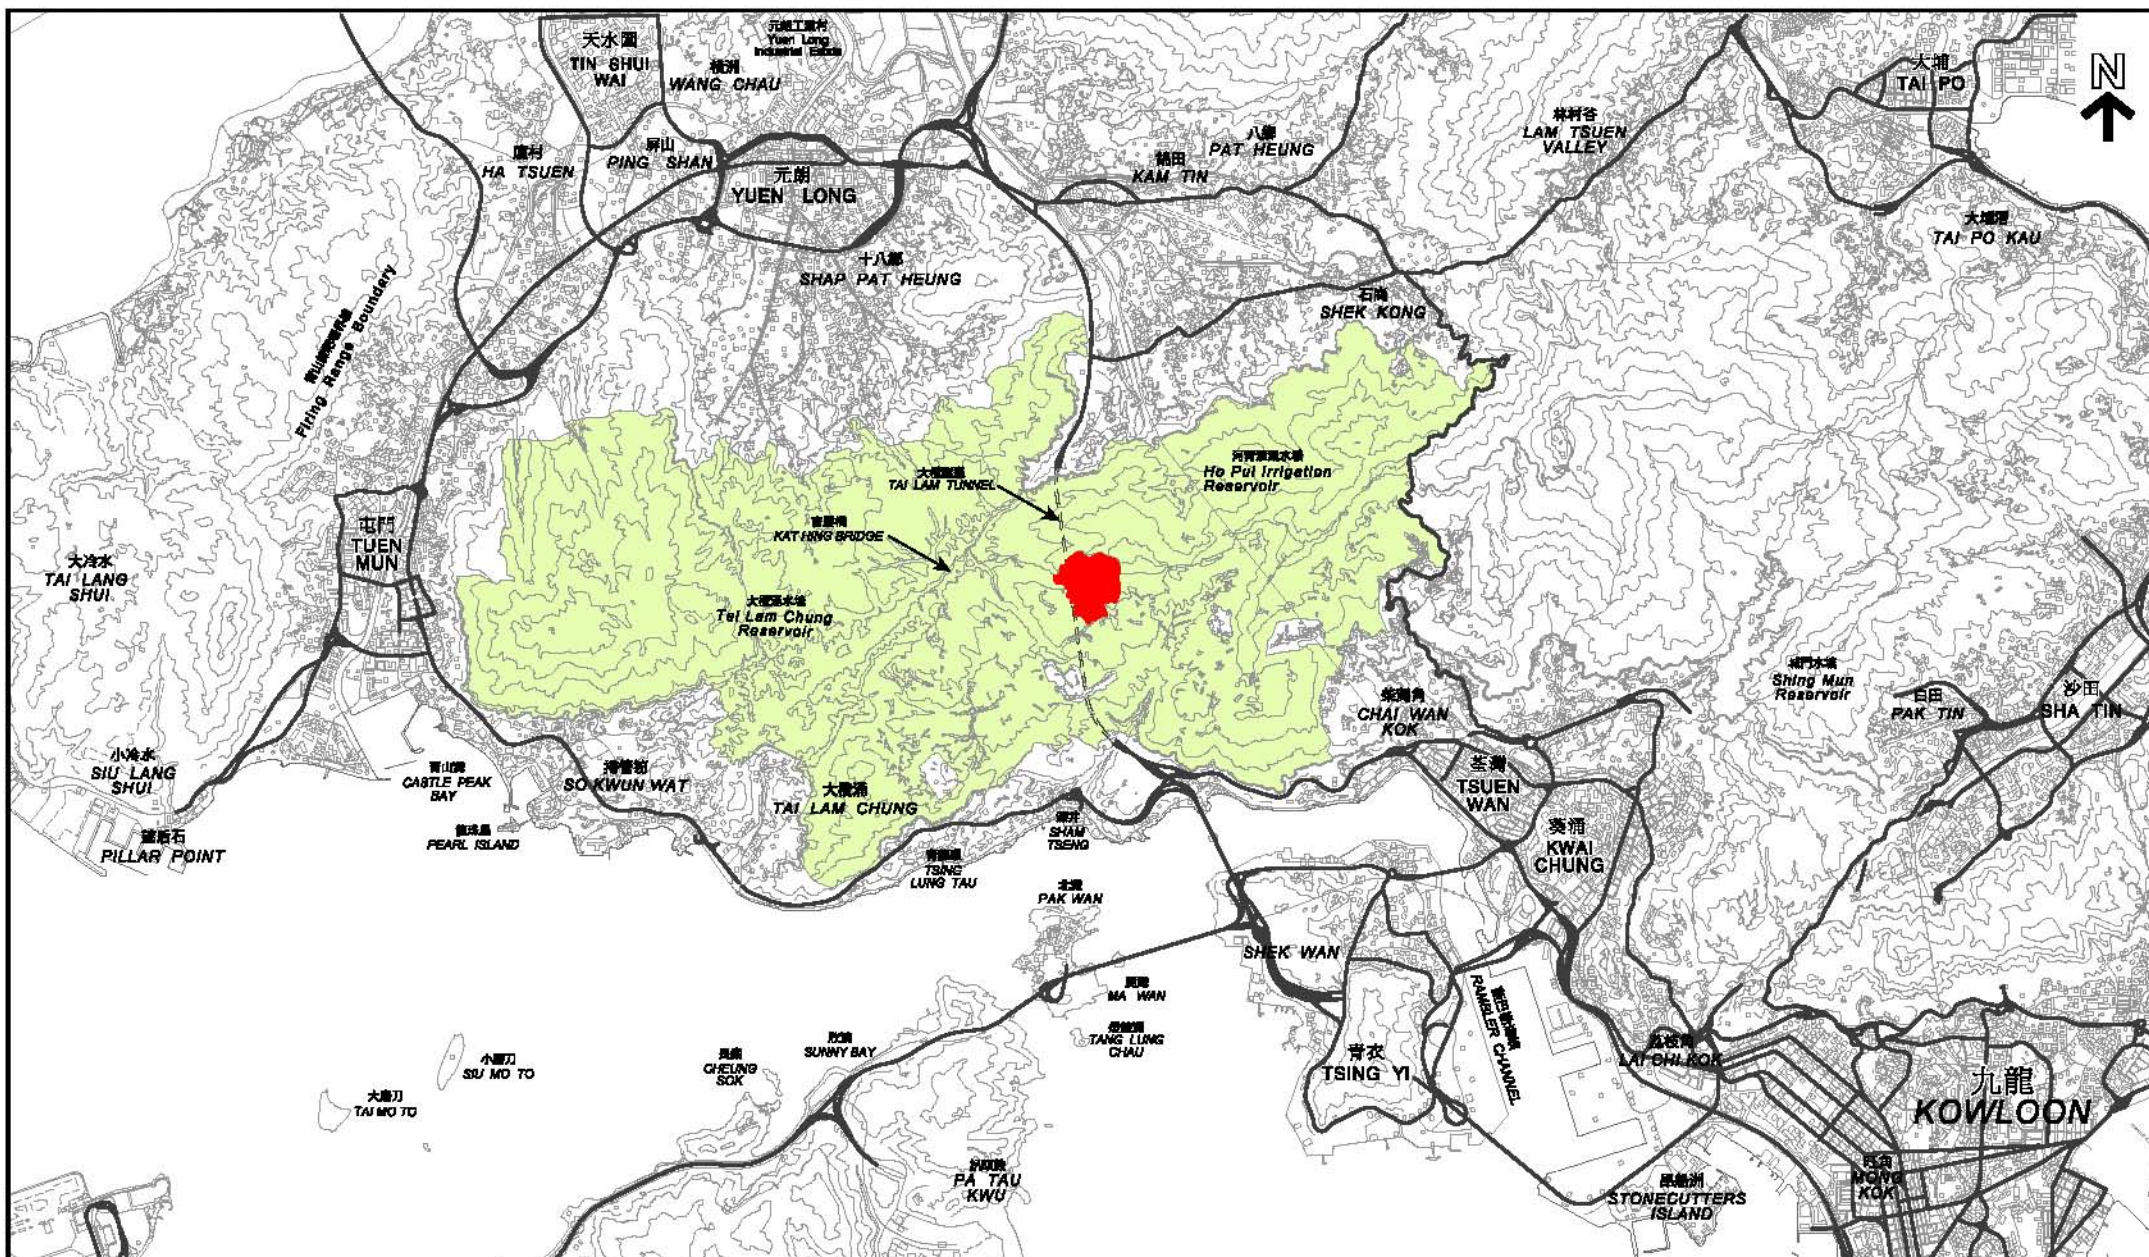

- 12.3 Notwithstanding the above, minor improvement works, e.g. laying of utility services, will be implemented through the Public Works Programme, the Rural Public Works, and the Local Public Works subject to priority and resources availability. Private developments will be effected principally through private sector initiatives to develop or redevelop their properties in accordance with the zoned use indicated on the Plan, provided that their proposals meet Government requirements.

13. PLANNING CONTROL

- 13.1 The types of permitted developments and uses on land within the Area are listed in the Notes to the Plan. Unless otherwise specified, all building, engineering and other operations incidental to and all uses directly related and ancillary to the permitted uses and developments within the same zone are always permitted and no separate permission is required.
- 13.2 Uses of land or building which were in existence immediately before the first publication in the Gazette of the notice of the draft DPA plan and which are not in compliance with the terms of the Plan may have adverse impact on the environment, drainage and traffic of the Area. Although no action is required to make such use conform to the Plan, any material change of such use or any other development (except minor alteration and/or modification to the development of the land or building in respect of such use which is always permitted) must be always permitted in terms of the Plan or, if permission is required, in accordance with a permission granted by the Board. The Board will consider these applications on their individual merits. Those alteration and/or modification works which may lead to an environmental improvement or upgrading to the Area may be considered favourably by the Board.
- 13.3 Planning applications to the Board will be assessed on individual merits. In general, the Board, in considering the planning applications, will take into account all relevant planning considerations including the guidelines published by the Board. Guidelines published by the Board are available from the Board's website, the Secretariat of the Board and the Technical Services Division of the Planning Department. Application forms and Guidance Notes for planning applications can be downloaded from the Board's website and are available from the Secretariat of the Board, and the Technical Services Division and relevant District Planning Office of the Planning Department. Applications should be supported by such materials as the Board thinks appropriate to enable it to consider the applications.
- 13.4 Any development, other than those referred to in paragraph 13.1 above or in conformity with the Plan or with the permission of the Board, undertaken or continued on land included in the Plan on or after the date of the first publication in the Gazette of the notice of the draft DPA plan may be subject to enforcement proceedings under the Ordinance. Any diversion of stream, filling of land/pond or excavation of land in the relevant zones on or after the date of the first publication in the Gazette of the notice of the draft DPA plan without permission from the Board may also be subject to enforcement proceedings. Moreover, there is a presumption against diversion of stream

and filling of pond for temporary use or development in conservation-related zonings, such as “Conservation Area”.
