

About Us

Established in December 2013, HKI-SIA is a membership organization for practitioners, academics, businesses, funders and investors who have an interest in the assessment and promotion of social value.

We work with our members to increase the accounting, measuring and maximizing of social value from the perspective of those affected by an organization's activities, through our Social Value Principles. We believe in a world where a broader definition of value will change decision making and ultimately decrease inequality and environmental degradation.

To achieve our mission, HKI-SIA provides training and consultancy services, as well as hosting regular meetings and events, creating new tools and resources, and forging collaborative networks at local and regional levels. Through supporting and working with our members, and as a Member Network of Social Value International, we are creating an international movement for change.

Examples of organizations from various sectors that have partnered with HKI-SIA to promote impact measurement for maximizing value creation (in alphabetical order):

- Bright China Foundation (Beijing)
- BSR (Business for Social Responsibility)
- Centre for Quality of Life at the Chinese University of Hong Kong
